TO PROBE FIGURES ON GAS Blizzard Bestirs the

Experts to Investigate Company Property Valuation, Special to The World.

MIAML March 2.-The fight be gun some time ago by Muami and other nearby towns against the rate increase sought by the gas company which serves this district has not been abandoned, but will be continued with intelligence and vigor until complete victory is won or decisive defeat suffered. Consideration is being given to the employment of anytheraping expense. is being given to the employment of engineering experts to secure the necessary data relative to the actual valuation of the gas company's property and the true earnings thereon, so as to be able to demonstrate the fact that the large mercase which the corporation commission is asked to allow is not necessary to afford the company a fair profit on the capital invested.

Representatives of the Burns & McDonald Engineering company of Kansas City were here during the past week conterring with the city officials and siring up the job. They estimated that it would cost between \$1,000 and \$1,500 to dig up all the facts and figures recessivy to con-lat the machinations of the gas people. This was thought to be reasonable, and it is reconstituted in contract covering the work will shortly be made.
